

# BRIDGING THE GAP, ONE NANO STEP AT A TIME

## NANOFINANCE

# WHAT IS NANOFINANCE?

- ✓ It is a revolutionary approach to financial inclusion.
- ✓ It's all about accessibility, simplicity, and empowerment.
- ✓ Nano operates on a small scale, addressing the critical needs of the very poor.
- ✓ Nanofinance helps the most financially vulnerable when microfinance falls short.

# MICROFINANCE VS NANOFINANCE

What is the difference?

Are they different words  
for the same thing?

# MICROFINANCE VS NANOFINANCE

Microfinance serves the underserved.

Nanofinance serves the unserved."

## Microfinanciers;

- Are institutional lenders
- Have rigid structures
- Have relatively high operational costs

## Nanofinanciers;

- Are non-institutional lenders
- Have much more flexible terms
- Have very low operational costs

# WHEN MICRO ISN'T SMALL ENOUGH...

- ✓ High interest rates and transaction costs can be barriers.
- ✓ Many are left out due to fear of formal financing.
- ✓ Microfinance has now become increasingly similar to the banking industry, charging high-interest rates, and offering complicated financial products, leaving customers (financially) worse off than they were before.

# WHY NANOFINANCE?

- Flexible credit for MSMEs.
- No need for steady income, payroll, Credit history, or collateral.
- Caters to emergency needs: food, healthCare, education, and more.
- Creates a community within the community.

# NANOFINANCE

# NANOFINANCE: THE ANSWER TO FINANCIAL INCLUSION

- ✓ Nanofinance goes further than microfinance in reaching the unbanked and the underbanked.
- ✓ Reaches even the remotest corners of the world.
- ✓ No income or collateral? Nanofinance has got your back.
- ✓ Empowering communities with financial independence.

# INTRODUCING FIRSTMICRO - YOUR GATEWAY TO NANOFINANCE

- FirstMicro is the world's only application tailored exclusively to serve over 2 million nanofinance providers.
- It marks a groundbreaking milestone by setting a new standard in the global nano lending industry.
- FirstMicro's unified platform breaks down borders.
