

DRIVING FORWARD WITH PRECISION: UNVEILING THE POWER OF REAL-TIME GPS FLEET MANAGEMENT

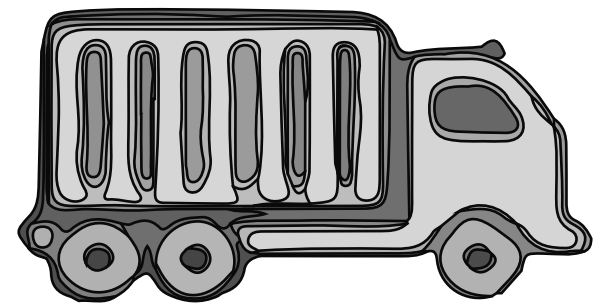

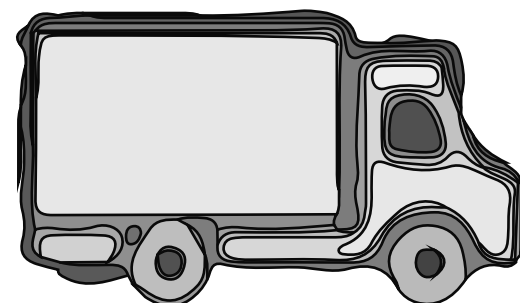

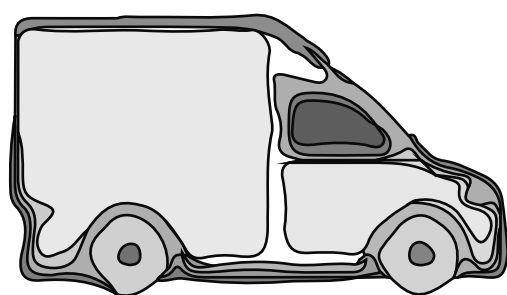

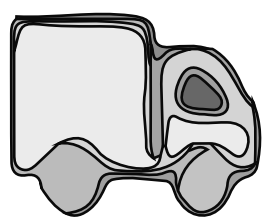

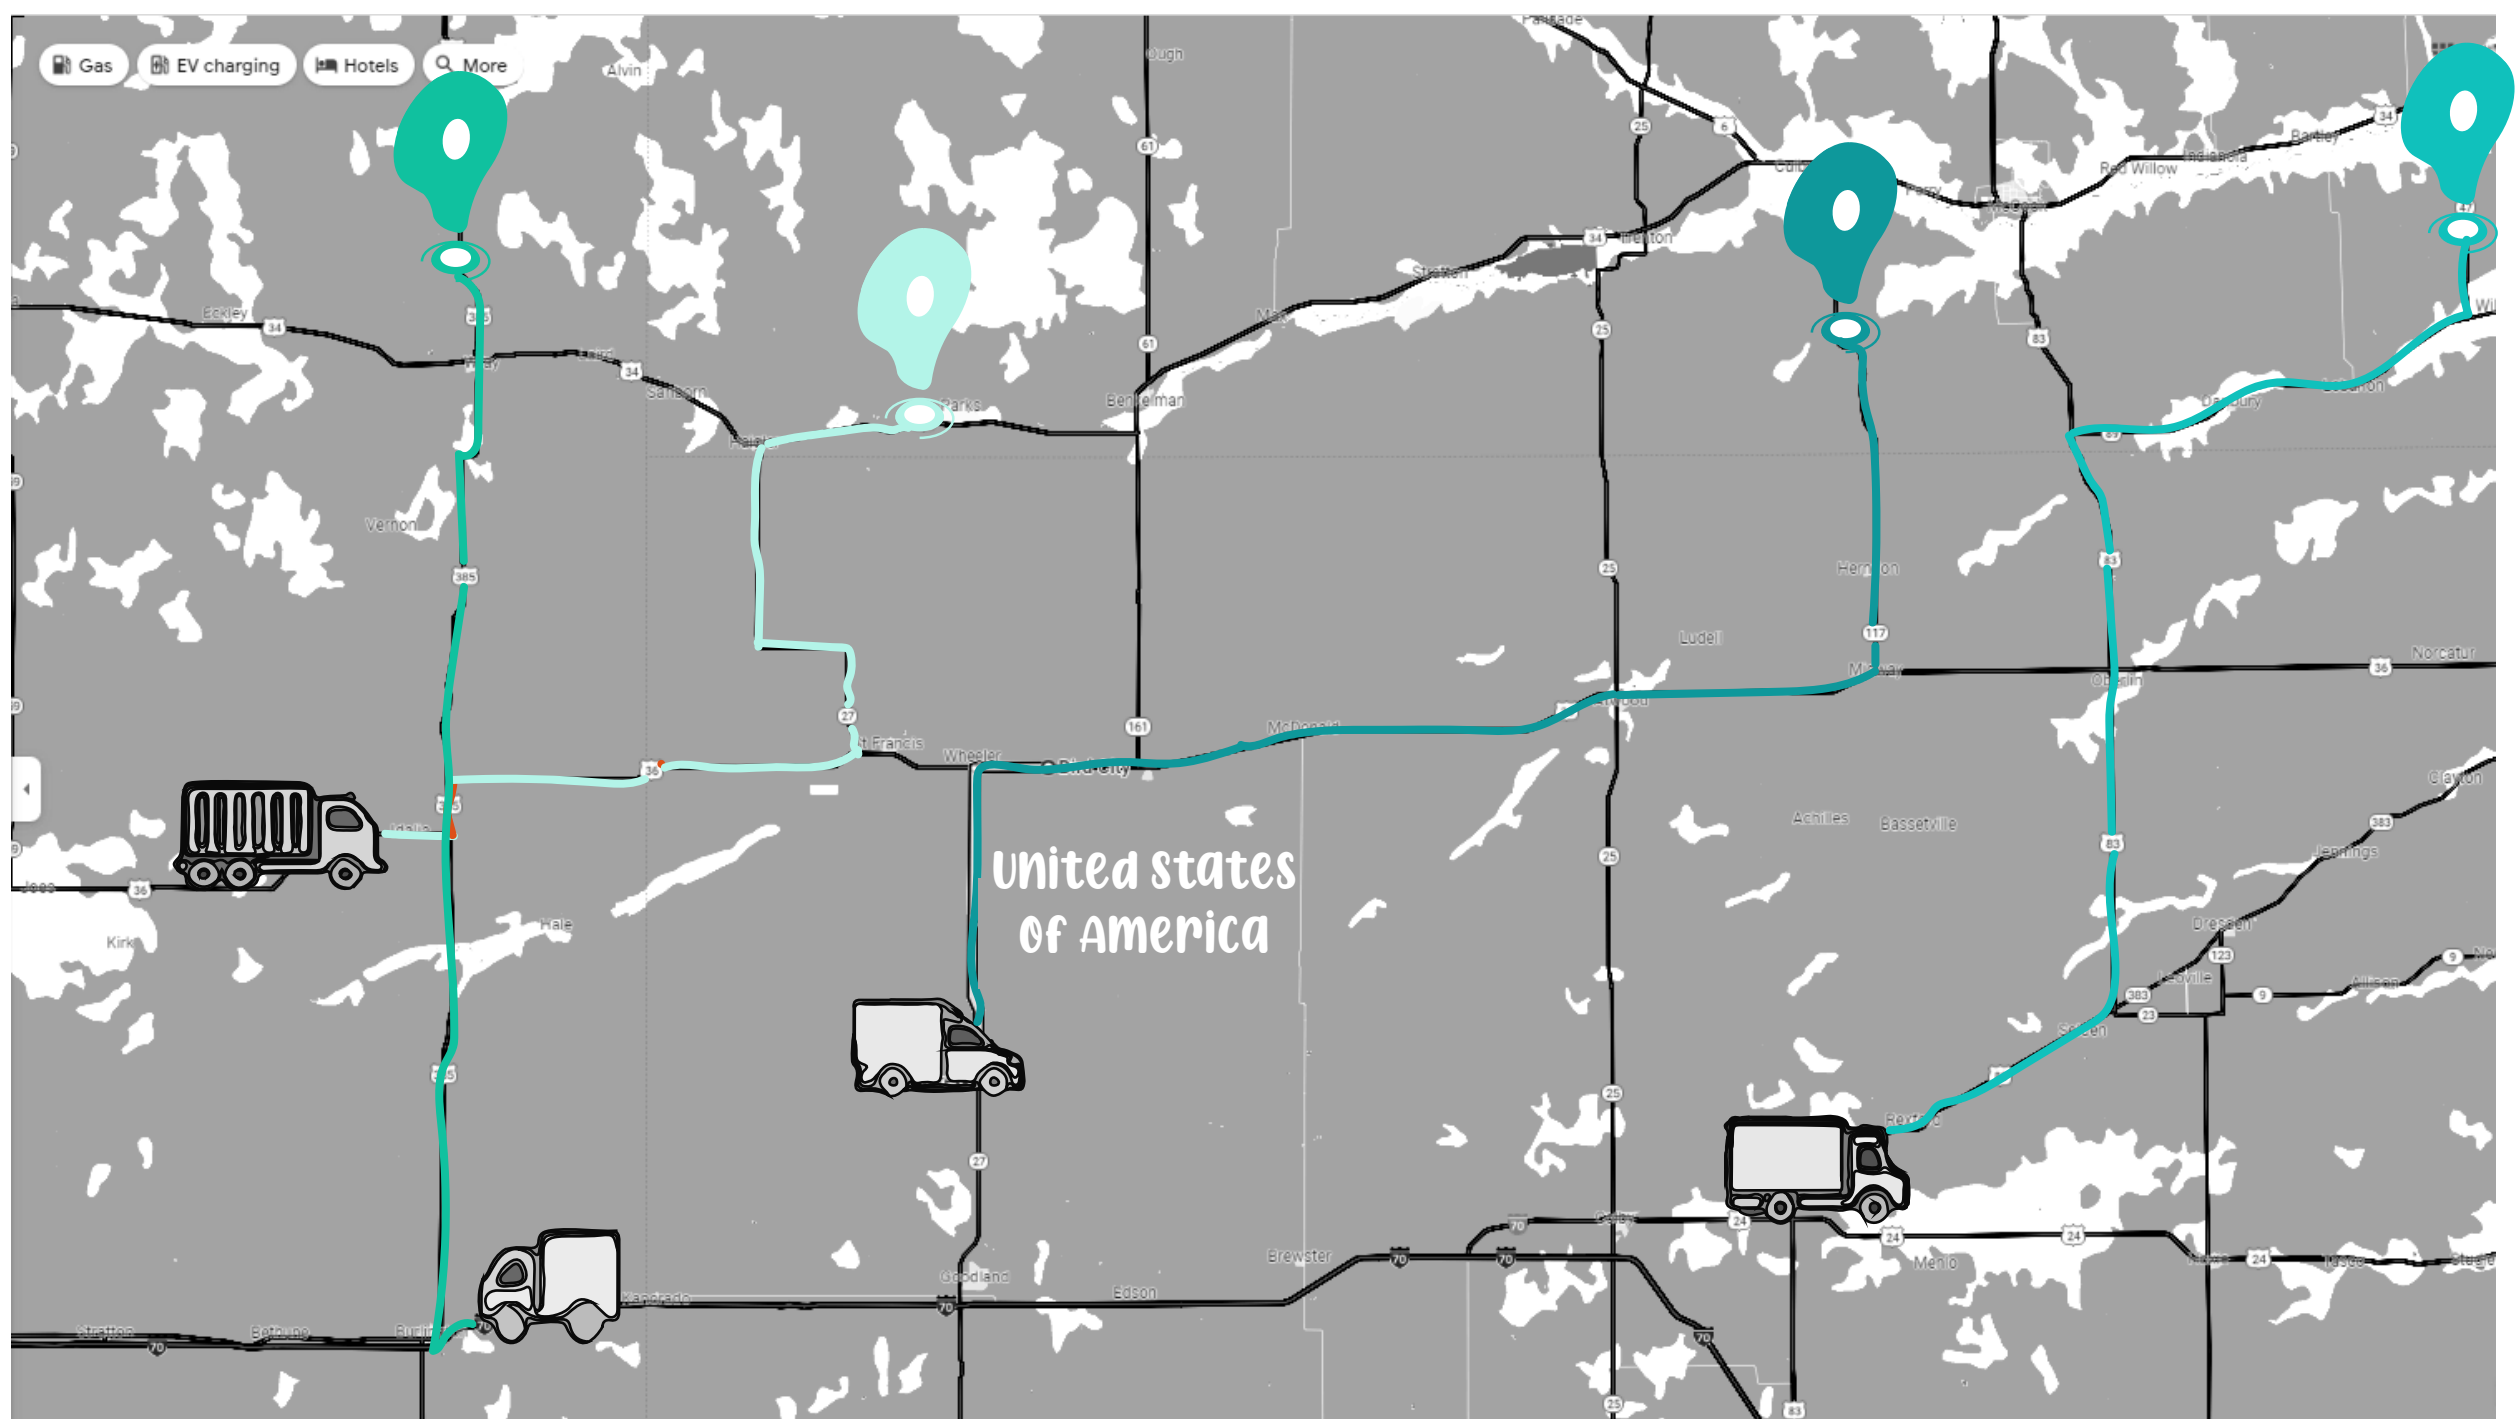

WHAT IS REAL-TIME GPS TRACKING?

Real-time GPS tracking is a technology that provides live location updates for vehicles using satellite signals.

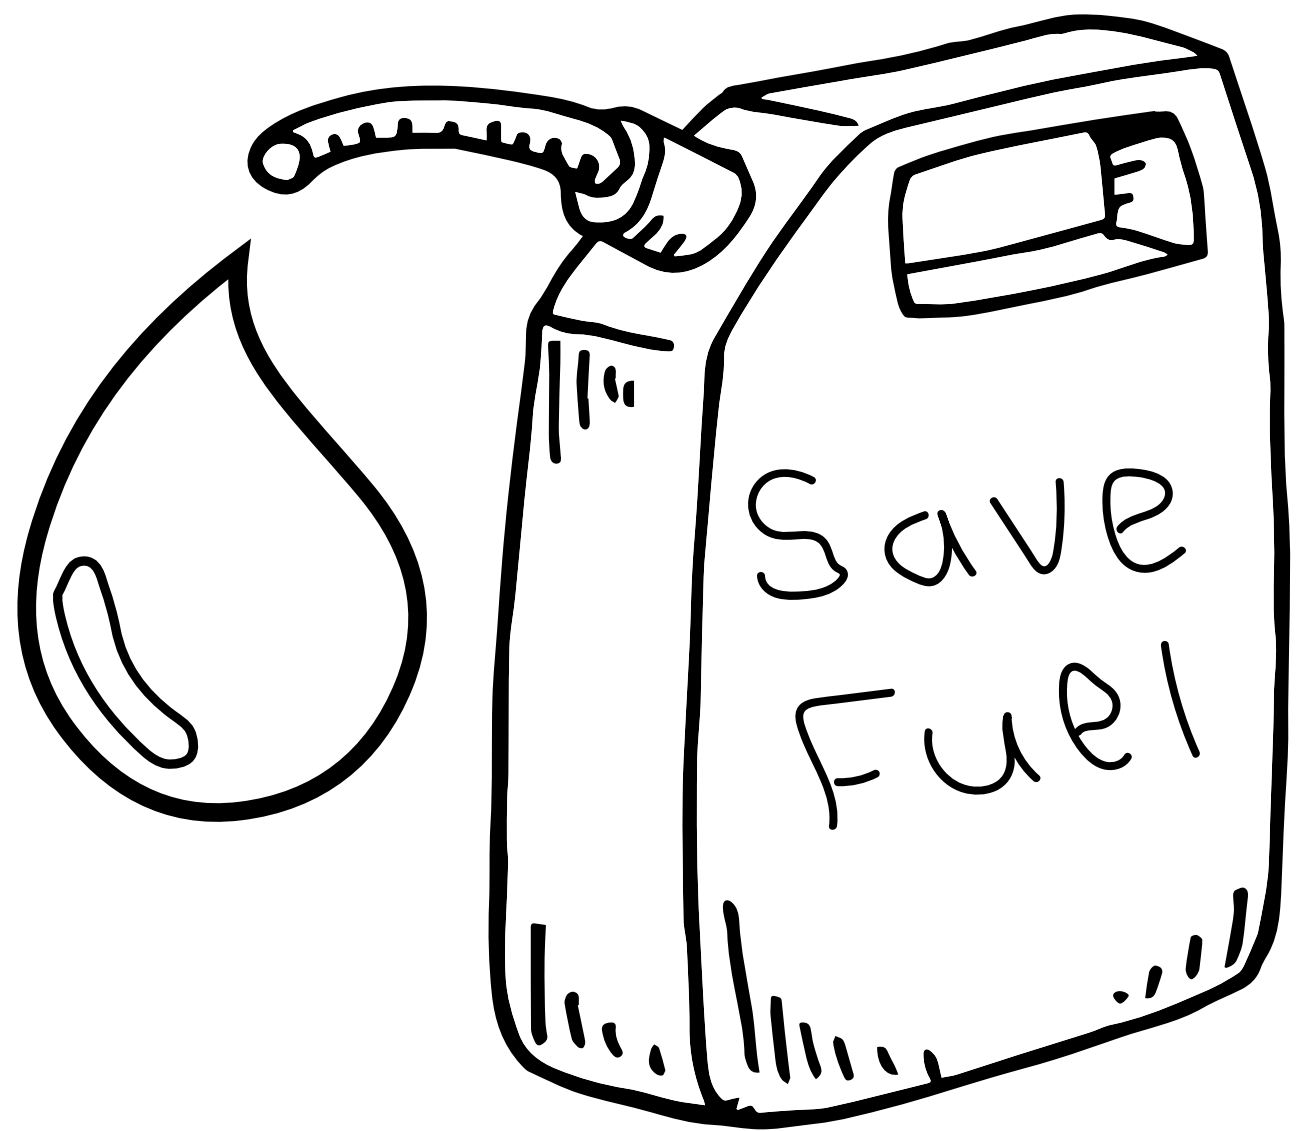

ACCURATE LOCATION TRACKING

Benefit: Always know where your vehicles are with pinpoint accuracy.

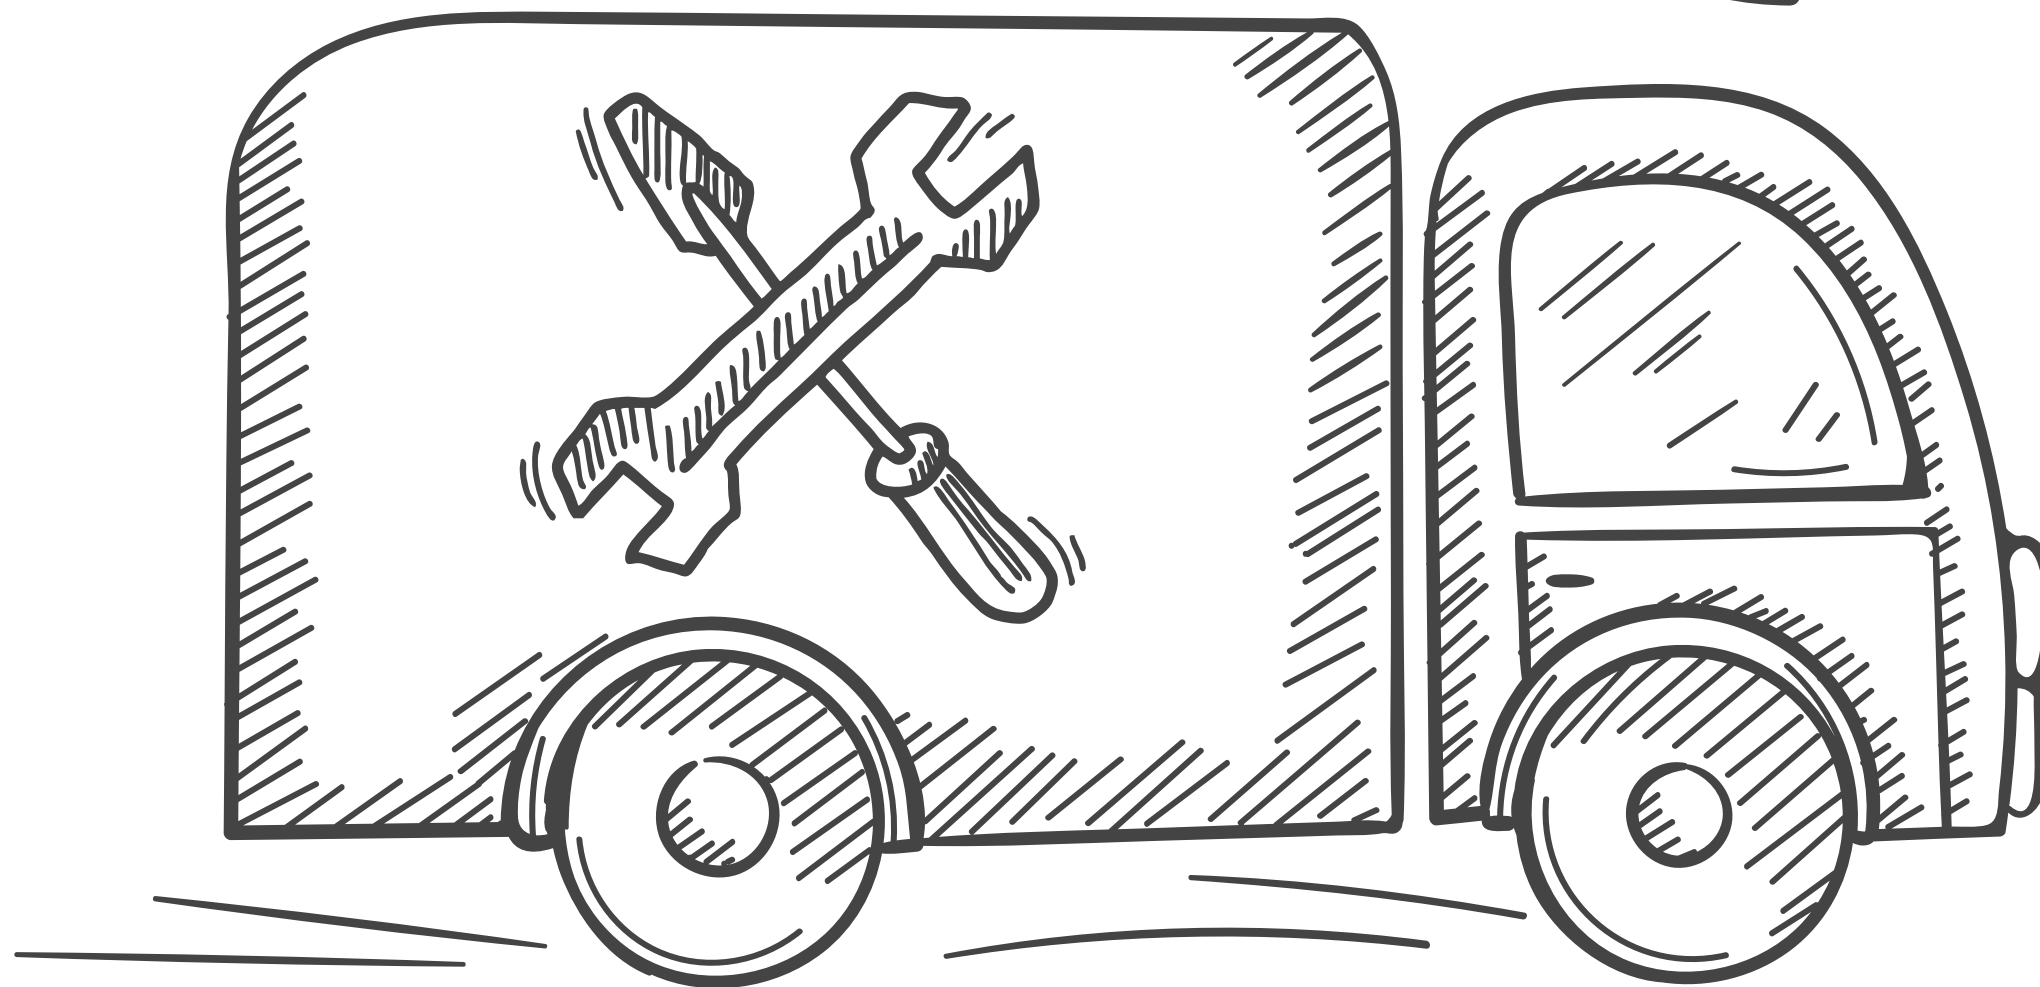

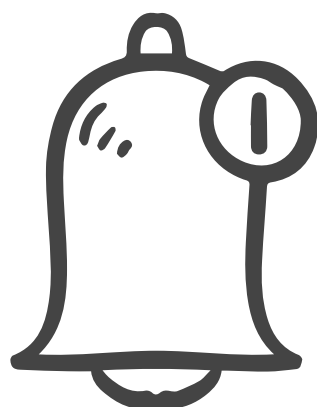

OPTIMIZED ROUTES

Benefit: Save time and fuel by choosing the best routes for your vehicles.

TIMELY MAINTENANCE ALERTS

Benefit: Receive notifications for vehicle maintenance based on real-time data.

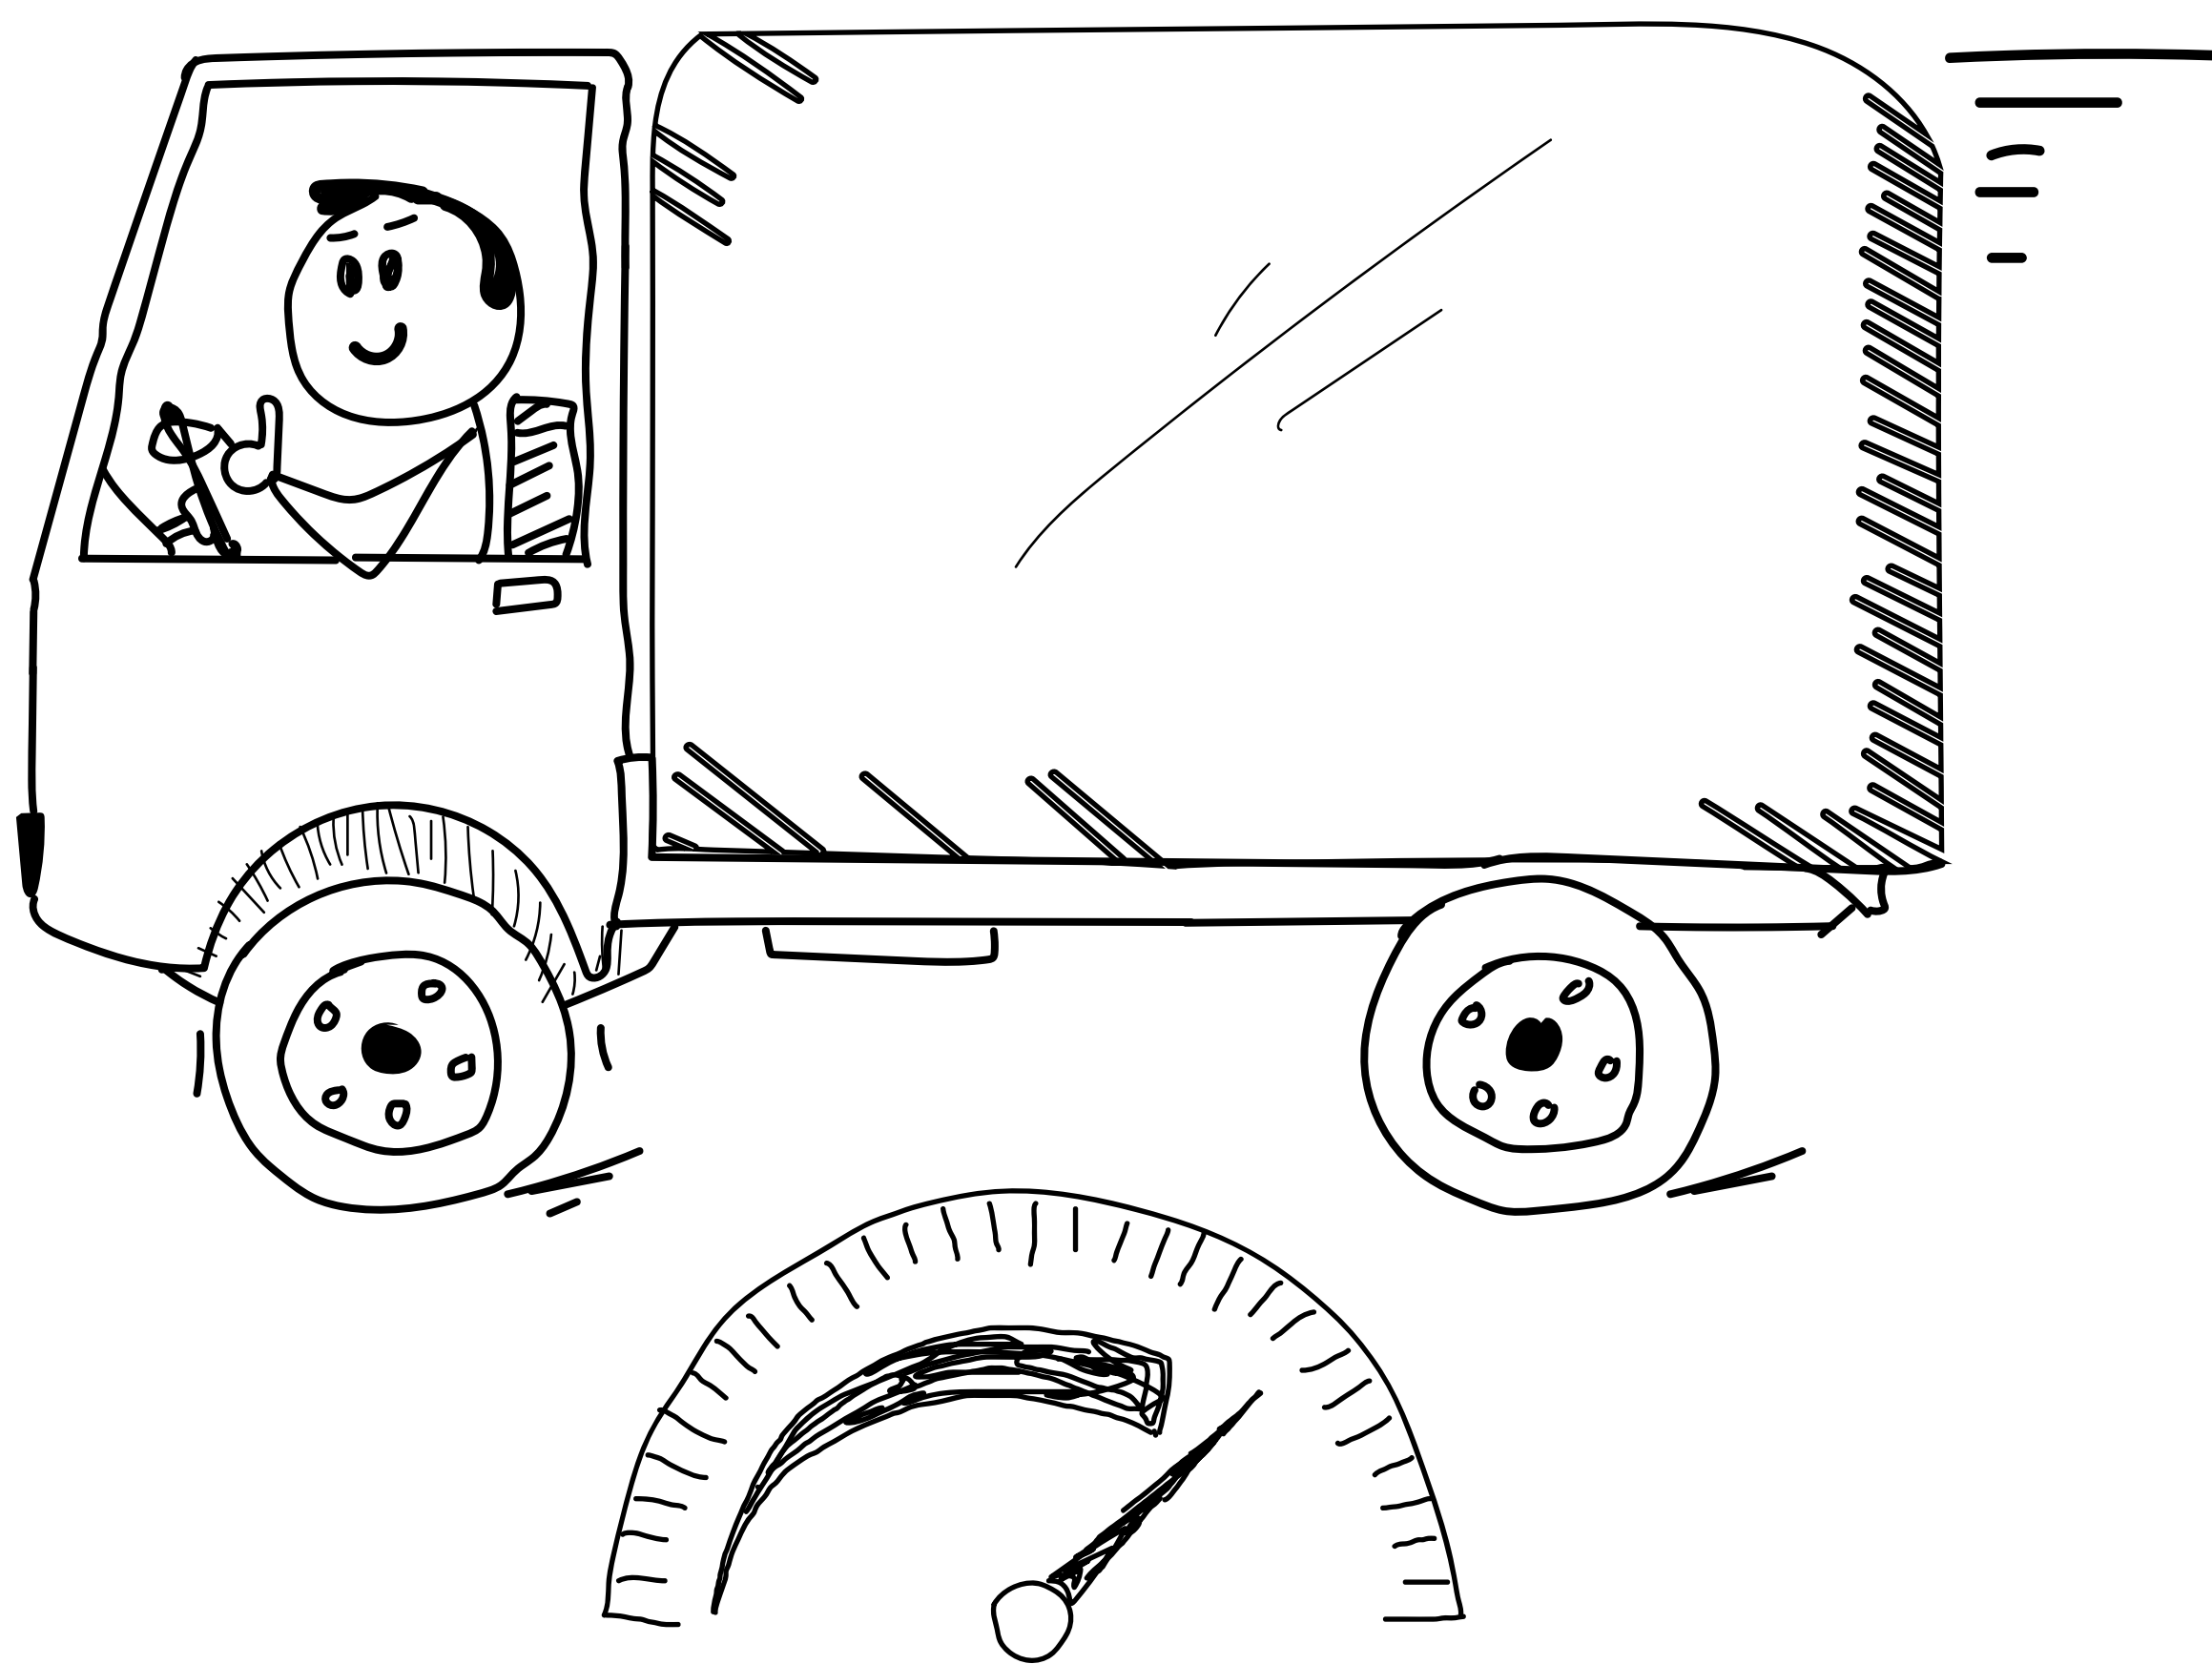

ENHANCED SECURITY

Benefit: Enhance vehicle security by tracking their movements and deterring theft.

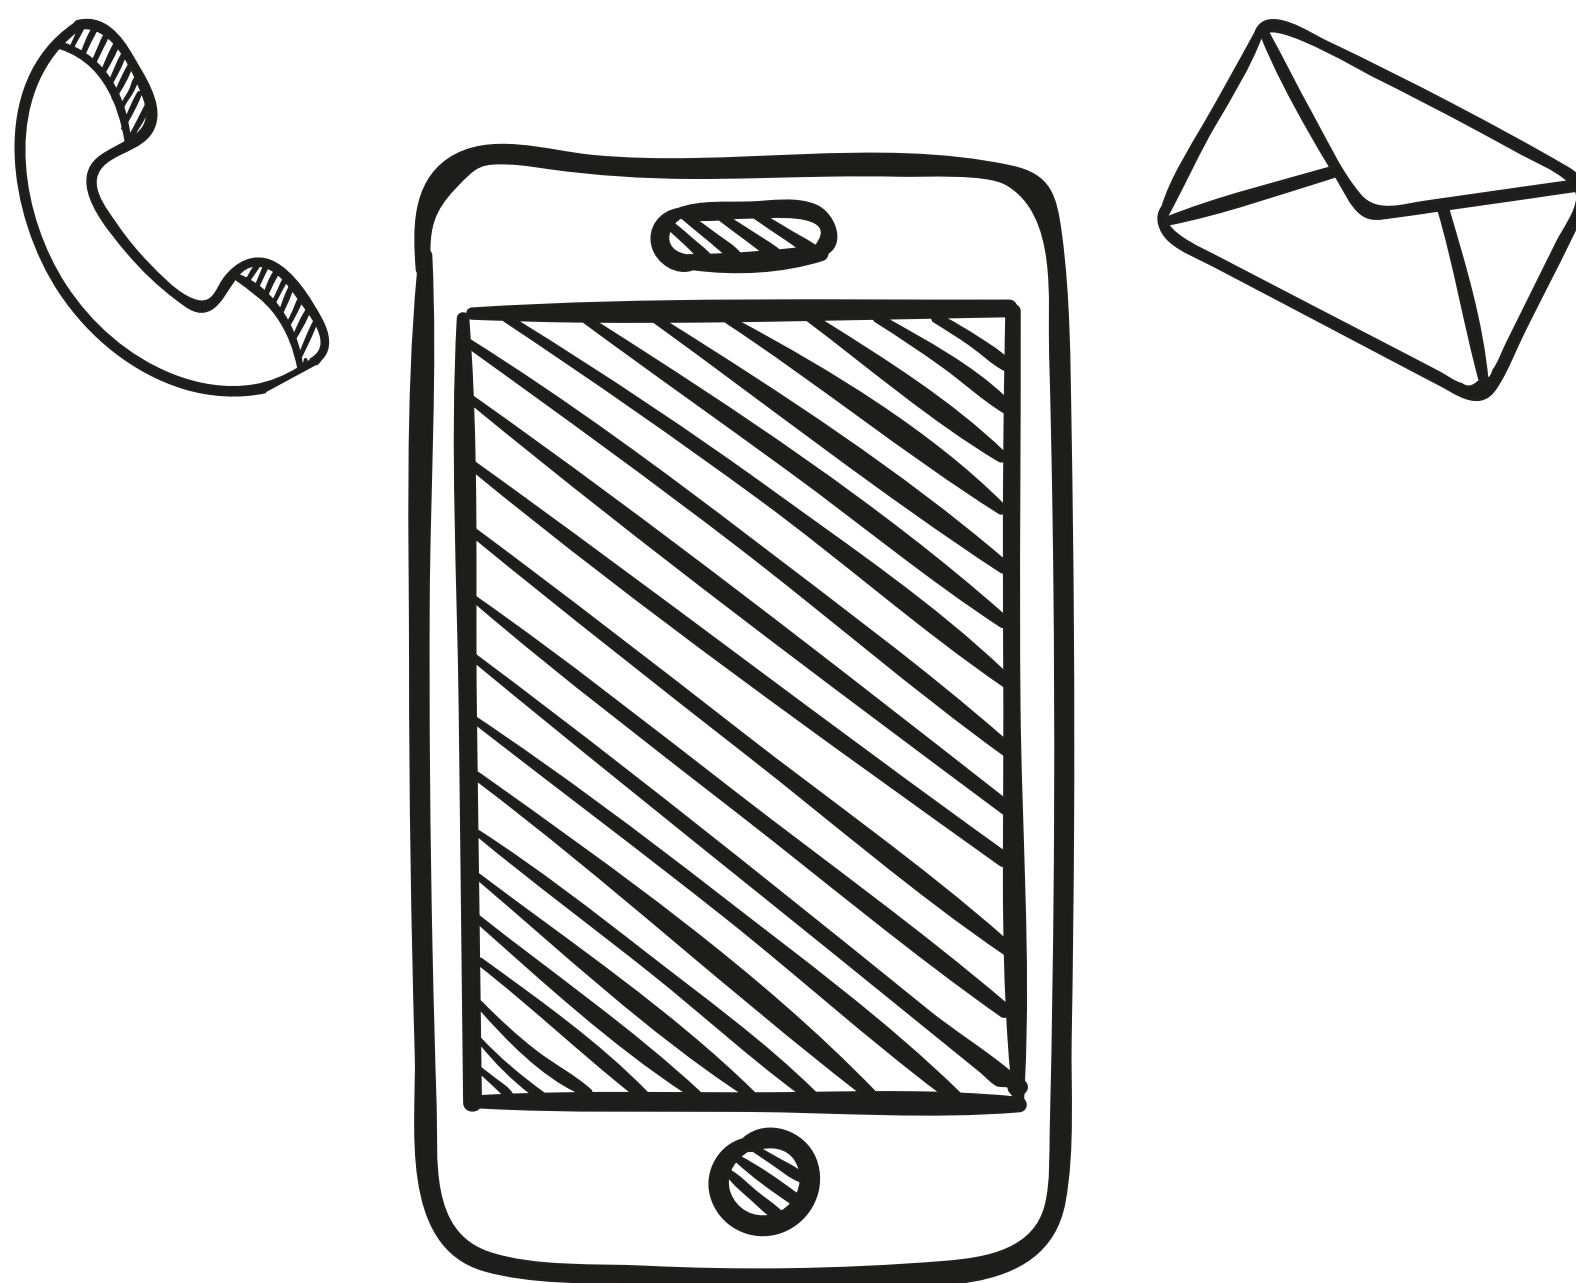

DRIVER BEHAVIOR MONITORING

Benefit: Promote safer driving habits by monitoring speed and behavior.

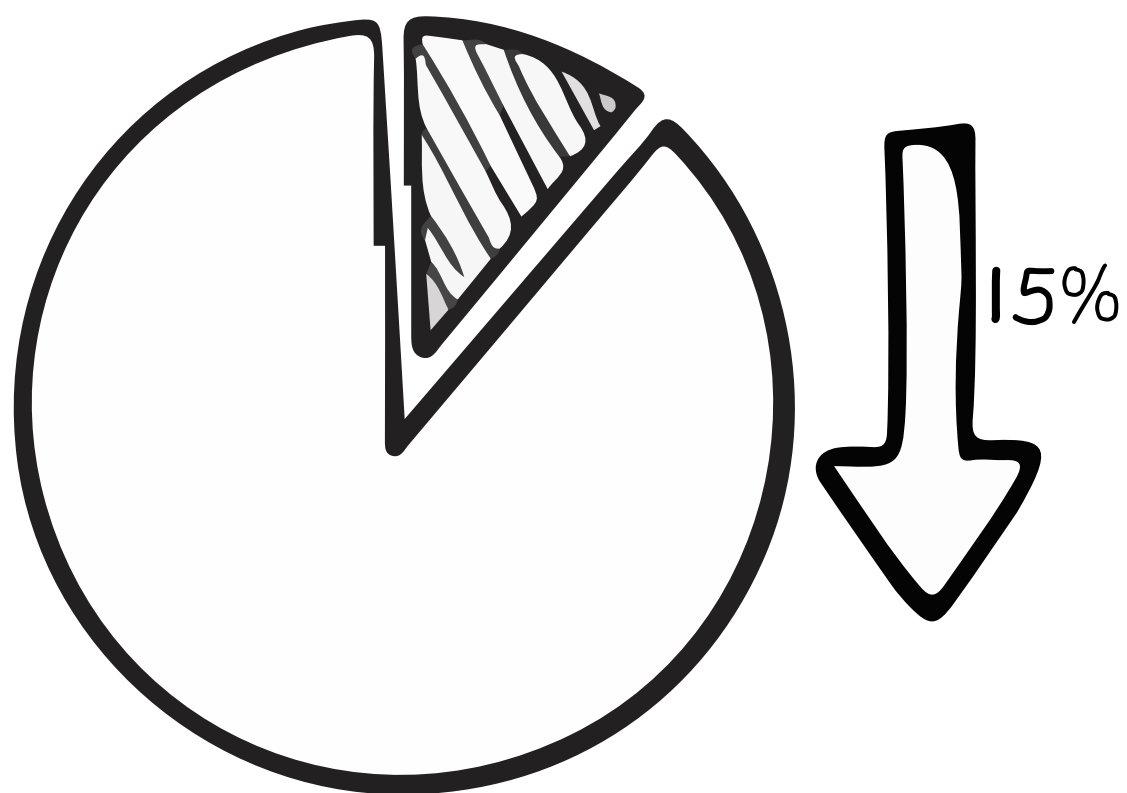

BETTER CUSTOMER COMMUNICATION

Benefit: Impress customers with accurate ETA and improved communication.

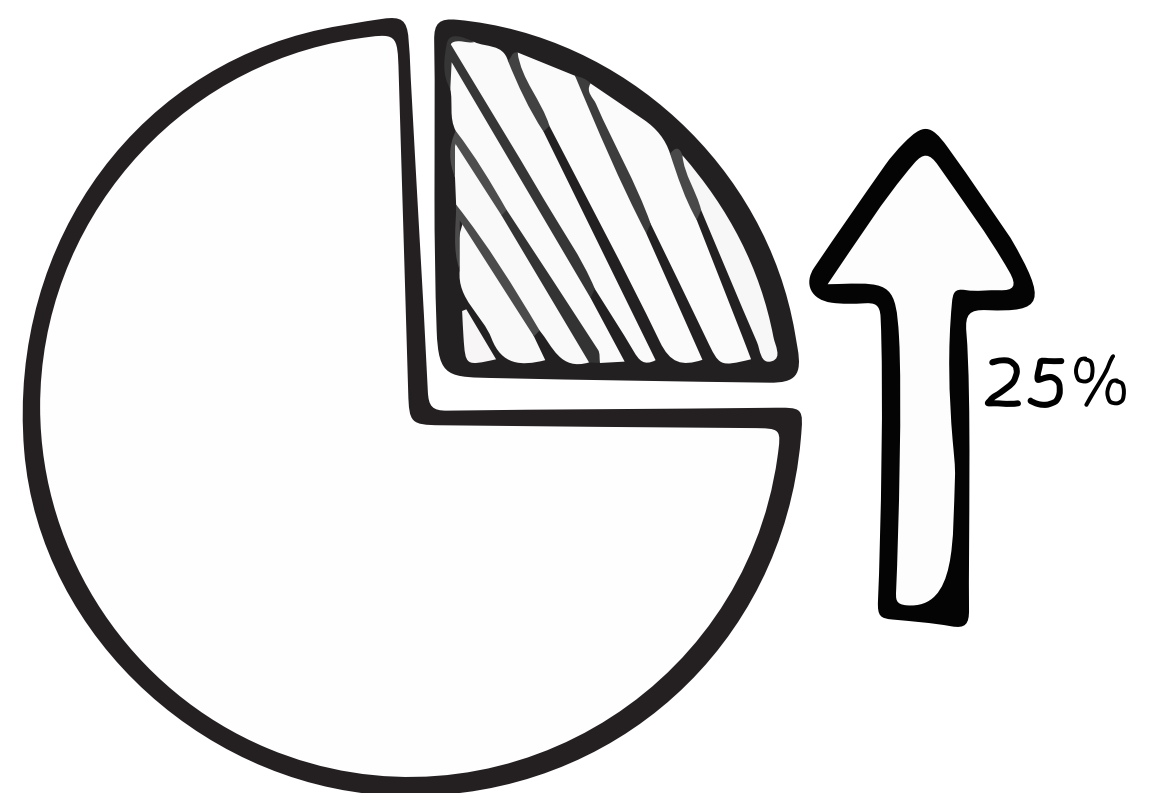

DID YOU KNOW

Companies that adopt GPS tracking in their truck management systems have reported up to 15% reduction in fuel costs and a 25% increase in overall operational efficiency.

ELEVATE YOUR FLEET MANAGEMENT GAME WITH FLEX

Ready to take your fleet management to the next level? Introducing Flex, your gateway to innovation and efficiency. Our state-of-the-art Fleet Management and Truck Booking System combines advanced GPS real-time tracking with unparalleled features. Join us to embrace the future of fleet management and experience the power of Flex!

FLEX FEATURES

○ INTERACTIVE REAL-TIME DASHBOARD

FLEX dashboard provides a snapshot of your fleet always available at your fingertips.

○ REAL-TIME TRACKING

FLEX provides real-time tracking via both GPS coordinates and mobile phones with an interactive real-time map feature.

○ PERSONALIZED CUSTOMER MAINTENANCE

Setting up both corporate and individual customers and the ability to modify the hire commission and the tariff charges. The company will be able to set up multiple pick-ups and drop-off locations according to availability.

○ USER MANAGEMENT

Allows the fleet administrator to create and manage their customer list whilst making any required changes. You will have the ability to create, edit, authorize, and generate QR codes to set up the active or inactive status of the vehicle.

○ CONFIGURATION AND MAINTENANCE

This module enables fleet management to set up trip alerts via both SMS and email.

○ EXTENSIVE REPORT GENERATION & PRINTING

FLEX is designed to generate all the needed reports for your audit purposes. (Vehicle reports, driver reports, Client reports, expense reports, etc.)

○ MULTIPLE PAYMENT METHODS

FLEX allows the customers to make the payments via personal/business cheques, Credit cards, or cash. An invoice generation feature is also embedded.
