FINTECHNOLOGY ASIA PACIFIC LANKA

OUR VISION

“To be the Most Accepted Solutions Provider through Simplicity”

ABOUT OUR COMPANY

FINAP is a renowned FinTech solutions provider that specializes in providing core banking, digital banking, and mobile banking solutions. We employ the best minds in the banking and finance space to envisage our FinTech concepts. Constant re-engineering and extensive market research ensure the best user experience, which helps sustain our customer-centric approach.

Every FINAP application is built upon four fundamental principles:

- ▶ User Experience
- ▶ Open API Platforms
- ▶ Parameterization
- ▶ Scalability

FINAP is an ISO 9001:2015 certified process-driven organization. We have won many accolades in recognition for our constant innovation in the FinTech domain and the quality of our products & services. We have diversified from our FinTech origins to facilitate bespoke software development, workflow automation, fleet management, and tech resource augmentation.

OUR COMMITMENT

STABILITY – FINAP solutions have the strength to withstand every challenging condition successfully.

SECURITY – FINAP solutions possess the best architecture and take the best security practices into consideration in design, development, and implementation.

QUALITY – We leverage our expertise to develop a solid software foundation for your organization that is reasonably defect-free and cost-effective.

OUR VALUES

- ▶ **One Team** - We always help and encourage each other
- ▶ **Achievement** - We always celebrate everyone's success
- ▶ **Customer Excellence** - We always prosper through making our customer's business the best
- ▶ **Governance** - We always do the right thing, at the right time, and all the time
- ▶ **Corporate Social Responsibility** - We always do our best to deliver solutions that are sustainable

THE BANKING SOFTWARE

ECOru provides an all-inclusive, modern, yet simple digital Core Banking System (CBS) built to empower small to more complex financial institutions & banks. Designed by industry specialists in accordance with international standards, ECOru offers Financial Service Providers (FSPs) the opportunity to create new distribution channels, competitive products, cost-effective service delivery, and provide a better customer experience.

Commercial Banks &
Savings Banks

Development Banks &
Finance Companies

Building Societies &
Credit Unions

Unlike many legacy banking systems, ECOru is a modern banking platform that supports open banking and can be parameterized to create customized financial products & services. The solution is designed to overcome common business issues in the finance industry. ECOru could be deployed as a cloud-based or as an on-premises implementation. The ability to interact well with third-party banking solutions sets ECOru apart from its competitors. FINAP has partnered with Microsoft Azure in order to provide secure, efficient, low-cost cloud-based services.

A closer look at ECOru...

CERT Sri Lanka.

NEO BANKING & WALLET SOLUTION

Oceanus is a powerful Neo banking platform where all the functions, people, and infrastructures are sustained by one revolutionary solution. Oceanus is highly interoperable and can be integrated with any core banking system or any third-party solution.

Oceanus is a four-in-one FinTech solution that empowers financial institutions with full-fledged core banking, agent banking, merchant banking, and a digital wallet.

Fully Fledged
Core Banking

Agent
Banking

Merchant
Banking

Digital
Wallet

Fully Fledged Core Banking

- ◆ Core banking platform to manage all back-office operations of Financial Service Providers

Agent Banking

- ◆ Bringing banking to the customer's doorstep. Empowers financial institutions to reach untapped markets of the financially underserved.

Merchant Banking

- ◆ Facilitate E-commerce & POS transactions and expand the bank's commercial footprint.

Digital Wallet

- ◆ Empower customers to make day-to-day transactions with smart devices, paving the way for a cashless economy and branchless banking.

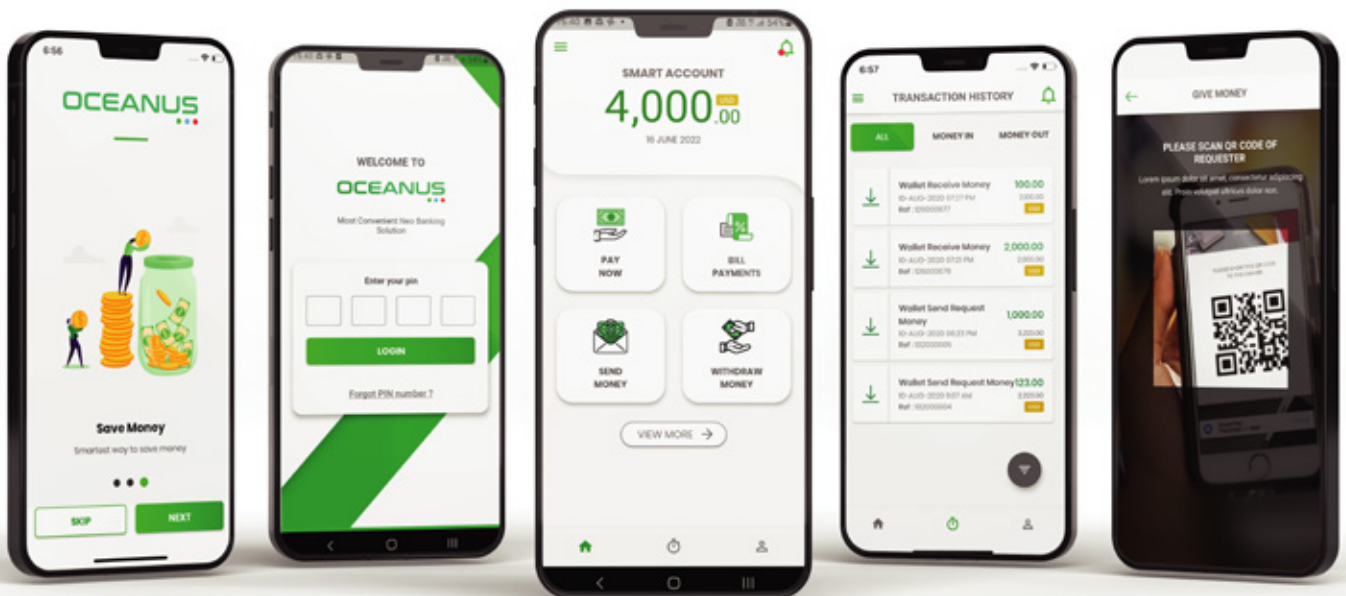

A closer look at Oceanus...

What can the Oceanus ecosystem do?

- ✓ Mobile wallet app
- ✓ Web portal for online transactions
- ✓ Biometrics for easy and secure logins
- ✓ End-to-end transaction security
- ✓ Transactions with QR codes
- ✓ Send money and receive money
- ✓ Bill payments & statutory payments
- ✓ Deposits and withdrawals
- ✓ Merchant payments
- ✓ Agent banking

Neo banking allows Financial Service Providers (FSPs) to enable a technology-rich service to their agents, merchants & customers via a mobile eco-system that ensures an extremely simplified banking experience for all parties involved with uncompromised financial benefits. The Oceanus neo banking solution facilitates branchless expansion for FSPs. Mobile banking & digital wallets also promote financial inclusion in remote areas where bank branches are scarce. Oceanus empowers FSPs to provide marketplace access to their customers and increase customer advocacy.

A closer look at Mula...

FIELD AGENT MOBILE APPLICATION

Mula, the Field Agent Mobile App digitalizes the core processes carried out by field agents of microfinance, finance, and banking while improving their efficiency, increasing customer advocacy, and reducing operational costs. It is embedded with real-time transactions, high-security controls & offline mode which enable field agents to work in remote areas with no internet; thus, eliminating the need for a customer to physically visit a central branch.

Less
Paperwork

High
Efficiency

Financial
Inclusion

Process
Automation

Offline
Functionality

Easy Customer
Onboarding

High
Interoperability

What can Mula do?

Mula is embedded with special functions and features that cannot be found in a stock standard application. An agent can use Mula to onboard customers, create loans, upload relevant documents, and disburse loans; all away from the bank's branch. Mula automates the entire loan process paving the way for a paperless bank. Hence Mula improves the sustainability and the availability of your financial institution.

The application facilitates real-time transactions and high-security controls. The built-in route setup function enables field agents to easily navigate their routes, and it enables managers to assign routes with ease.

Not your stock standard field agent application...

There is a vast untapped market of the unbanked and the underbanked population in the developing world, which traditional banking channels have failed to reach. Traditional banking infrastructure lacks innovation and is too costly to dominate the financially underserved market segments. Mula helps FSPs to overcome geographical barriers to reach the financially underserved. A network of strategically positioned field agents powered by Mula can facilitate branchless expansion.

The image shows a central smartphone displaying the Mula mobile application's login screen. The screen features the Mula logo at the top, followed by the text "Login to your account". Below this are two input fields: "Username" and "Password", each with a corresponding icon (a person for username and a lock for password). A "LOGIN" button is positioned at the bottom of the login section. The phone is flanked by two columns of feature highlights, each represented by a dark teal rounded rectangle with white text.

- iOS & Android Support
- Core Banking Integration
- Instant Customer Onboarding
- Collections, Deposits & Withdrawals
- User Transaction Limits
- Online & Offline Transactions

- Real Time General Ledger
- SMS Alerts & Receipt Printing
- Voice Recording Functionality
- Route Setup & Navigation
- Enquiries & Dashboards
- End of Day Proofing

FirstMicro

THE MICROFINANCE SOFTWARE

Pioneering Digital Transformation in Microfinance

FirstMicro is a cutting-edge **Microfinance Software Solution** crafted to empower microfinance institutions with digital excellence. This all-encompassing, cloud-native platform is designed to cater to the unique needs of microfinance operations, regardless of their scale.

Key Modules of FirstMicro Microfinance Solution:

Efficient Customer Management

Streamlined Loan Management

Group Lending

Reports & Enquiries
(20+ System generated reports)

Improved Loan Follow-up
Processes

Automated Alerts & Notifications

Comprehensive Payment
Management

Field Agent Mobile App
(Available only upon request)

Automated General Ledger

FirstMicro Microfinance Solution is the quintessential toolkit for microfinance institutions, especially tailored for small and medium-sized enterprises (SMEs). It is engineered to be a pivotal resource in enhancing their operational framework and propelling them towards unprecedented levels of success. With FirstMicro, these institutions gain a reliable and powerful suite of tools that are integral to their growth and service optimization.

NANOFINANCE SOLUTION

Where Little Loans Lift Big Dreams

We understand the vital role nanofinance plays in developing countries. That is why we created Cixor - the ultimate solution to empower nano lenders aligned with the United Nation's Sustainable Development Goals. Cixor is the only application of its kind built specifically for the 2 million+ nano finance service providers worldwide.

-  A low-cost monthly subscription model
-  3-minute customer onboarding process
-  Option to operate as a Shariah-compliant user
-  Quick & easy data migration process
-  Simple user configuration – register, subscribe, & start using
-  Real-time portfolio worth calculation (No EOD required)
-  Real-time double-entry processing
-  Multilingual system
-  Access in respective time-zones

With Cixor, we are paving the way toward a more inclusive and prosperous future, where even the smallest loans can help lift the biggest dreams. Our platform provides the financial tools needed to empower the most vulnerable and help them escape poverty.

TRUCK BOOKING & FLEET MANAGEMENT SOLUTION

FLEX is FINAP's truck booking and fleet management solution that facilitates the transactions between customers, truck drivers, and truck owners. This application is built with unique features specific to the truck booking industry. FLEX's real-time transport monitoring and control system was designed to help organizations reduce fleet operating costs and save employee time while providing updates and information on hires, loads, tracking, and costs in a user-friendly manner. The solution can be implemented; both on-premises and in a cloud ecosystem.

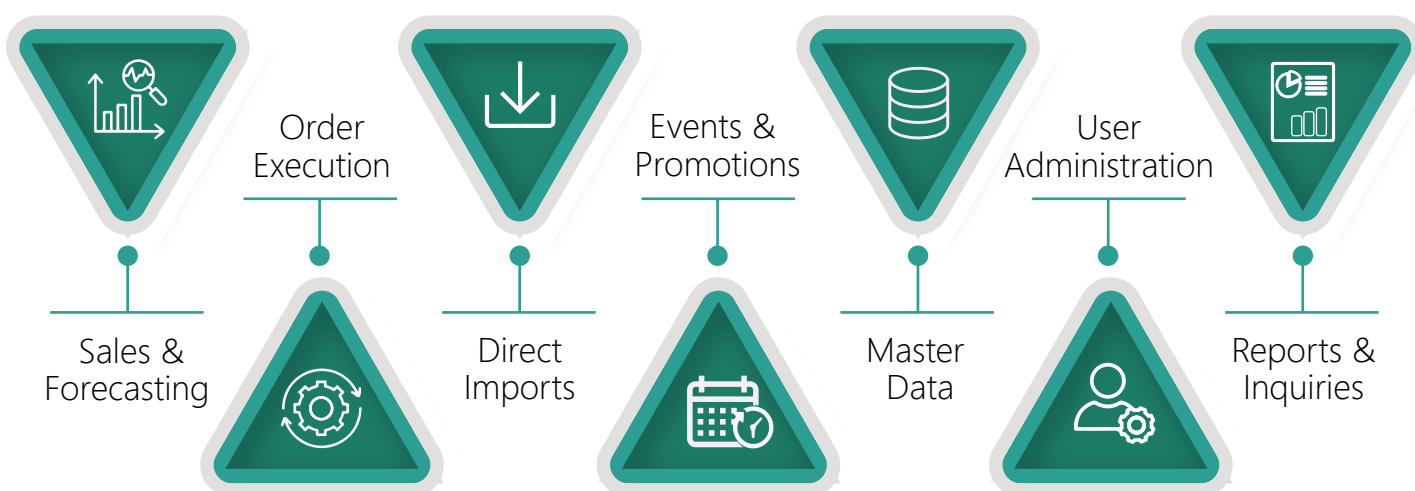

We have designed FLEX to withstand adverse market conditions and to efficiently manage your fleet during crisis situations such as the 2021 shortage of Heavy Goods Vehicle (HGV) drivers in the UK.

RETAIL ORDER MANAGEMENT & FORECASTING SOLUTION

Retail Order Management & Forecasting Solution (OMS) is a state-of-the-art software solution designed for demand forecasting and stock replenishment, catering to retail enterprises. OMS is a comprehensive system that can keep track of consumer, supplier & warehouse data, identify patterns and generate forecasts.

OMS consists of the following modules,

OMS was successfully implemented and is currently in operation in the leading supermarket chain in Sri Lanka.

A closer look at OMS...

MOBILE-BASED DELIVERY APPLICATION

Introducing DROP it OFF – the ultimate last-mile delivery solution tailored for the retail industry. As the essential final step in the online ordering services provided by major supermarket chains, our application efficiently connects registered drivers with customer delivery orders. When an order is placed via the online platform, the nearest outlet fulfills the request, sending an instant notification to nearby registered drivers, simplifying and enhancing the delivery experience, DROP it OFF sets a new standard for convenience in the retail sector.

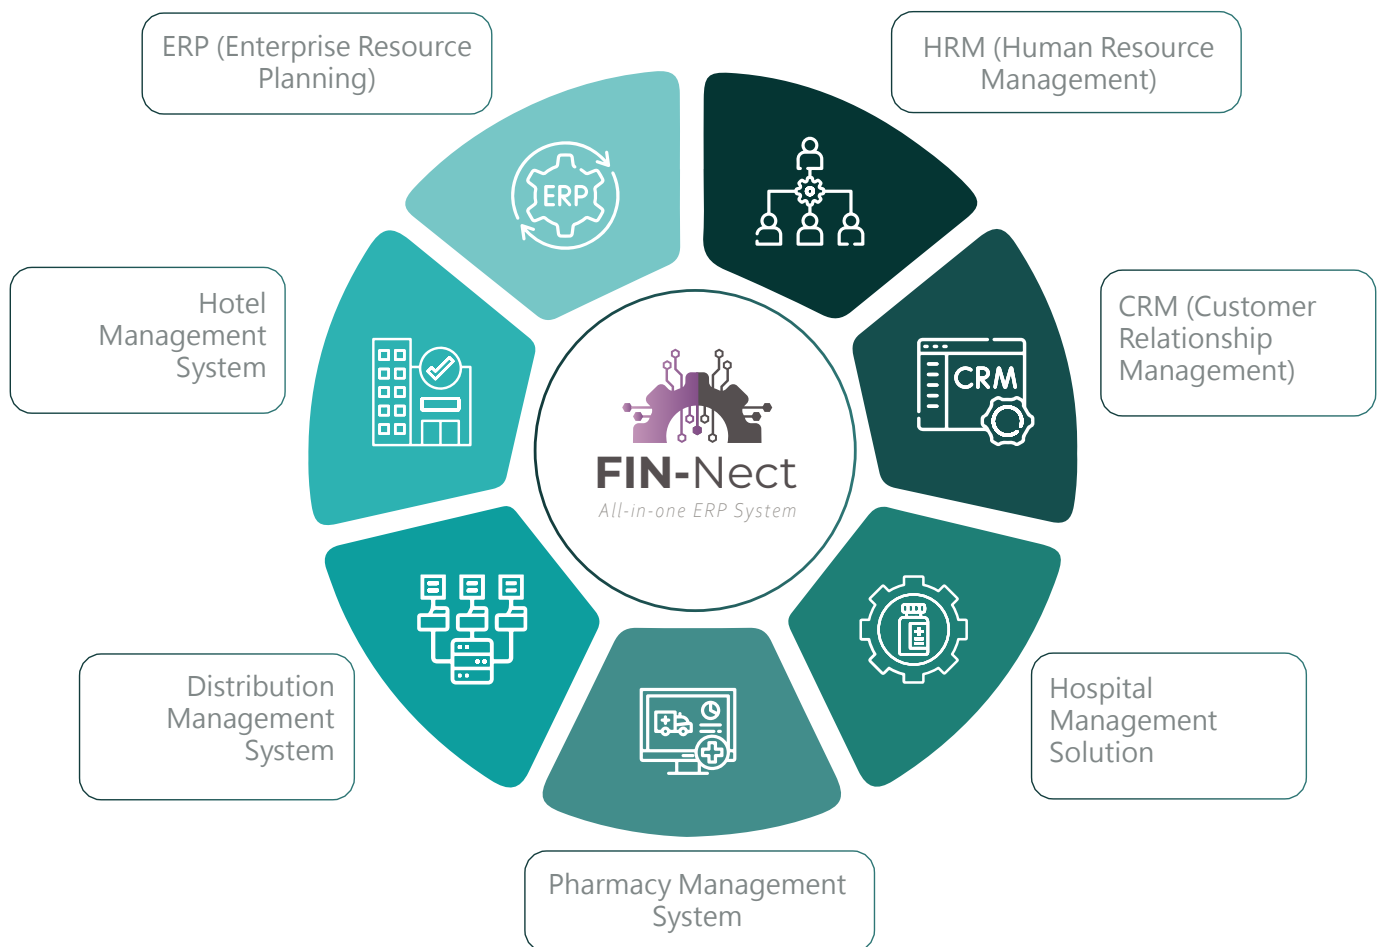

DROP it OFF Concept Diagram

FIN-NECT ENTERPRISE CLOUD

ERP (Enterprise Resource Planning) is an integrated software system that streamlines and manages core business processes, improving efficiency and decision-making within an organization. By unifying diverse systems into a single platform, ERP enhances real-time data visibility, enabling proactive and informed strategic planning.

WAREHOUSE MANAGEMENT SYSTEM

Efficient warehouse management plays a vital role for businesses handling tangible goods, especially in the manufacturing industry, which frequently faces challenges in balancing surpluses and shortages. Streamline your warehouse operations receiving, inventory, storage, packing, and shipping for seamless day-to-day processes.

The Warehouse Management Process

01

Receiving - Quality & Quantities
Ensure precision from the start. Our WMS lets you meticulously check and code incoming goods for accuracy and quality, laying a strong foundation for seamless inventory management.

02

Put-Away - Optimized Storage Allocation
Efficiently transport goods from docks to designated areas. Our WMS optimizes put-away, placing items in ideal spaces for easy retrieval, ensuring streamlined accessibility.

03

Storage - Smart and Secure
Safeguard your items in optimal conditions. Our WMS features a smart storage system, indexing all spaces for easy tracking.

04

Picking - Swift Order Fulfillment
Speed up order fulfillment with our intuitive picking features. Effortlessly locate items, ensure accurate picks, and fulfill customer orders promptly.

05

Packaging - QR Coding for Traceability
Streamline the packaging process with our WMS. Efficiently pack items and generate QR codes for traceability.

06

Shipping - On-Time Delivery with Precision
Ensure on-time delivery with our WMS. Generate correct documentation and ship products to the right destinations at the right time.

WHAT'S NEXT

FINAP, which has been in business for seven years, is a market leader in worldwide and Sri Lankan software solutions. As evidence of our excellence, FINAP's solutions have revolutionised a number of significant Sri Lankan financial sector businesses.

We relocated our headquarters to Bahrain in 2023, which was our most recent expansion move following the 2022 relocation to establish our East Asia operation in Australia. Our business migration illustrates our expertise and growth in the worldwide market.

FINAP is continually pushing itself to be the best. Our agents, strategically placed in East Africa, South Asia, and South-east Asia, have an impact on worldwide markets. Regional competitiveness is a primary objective as we develop in Africa and Asia-Pacific.

We stress quality and security in order to succeed and develop globally. FINAP celebrates being a process quality champion by meeting the ISO 9001:2015 requirements and is currently being reviewed for certification as an ISO 27001:2022 firm. These accomplishments are more than just merit recognition; they illustrate our dedication to setting new benchmarks in the software industry.

AWARDS & RECOGNITIONS

National Best Quality Software Awards (NBQSA) 2020 GOLD Award Winner

Our flagship FinTech product, ECOru Core Banking Solution, was the Gold Award Winner of the "Finance & Accounting Solutions (FinTech) Business Services Category" in the NBQSA Awards 2020.

National Best Quality Software Awards (NBQSA) 2020 Most Innovative & Best Solution in Cloud Computing Award

ECOru Banking and Finance Solution was further recognised as the "Most Innovative & Best Solution in Cloud Computing" in the NBQSA 2020 awards.

National Best Quality Software Awards (NBQSA) 2021 Bronze Award Winner
